Get BNB Smart Chain into your MetaMask Wallet:

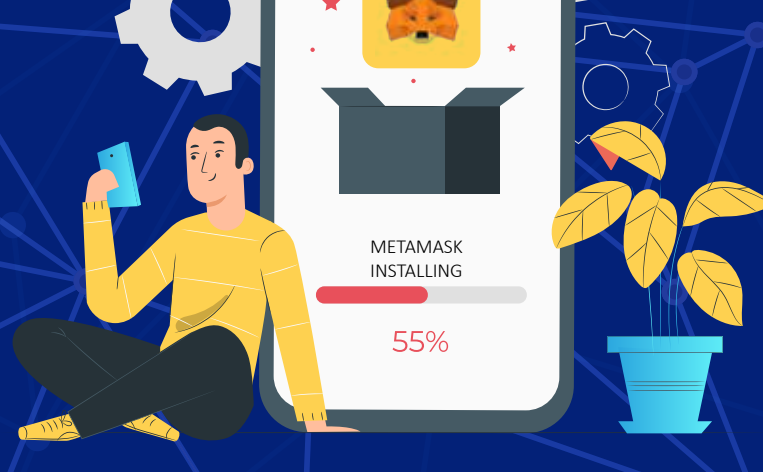

## 1: Create and Install a MetaMask Wallet

Video tutorial: [https://youtu.be/Af\\_IQ1zUnoM](https://youtu.be/Af_IQ1zUnoM)

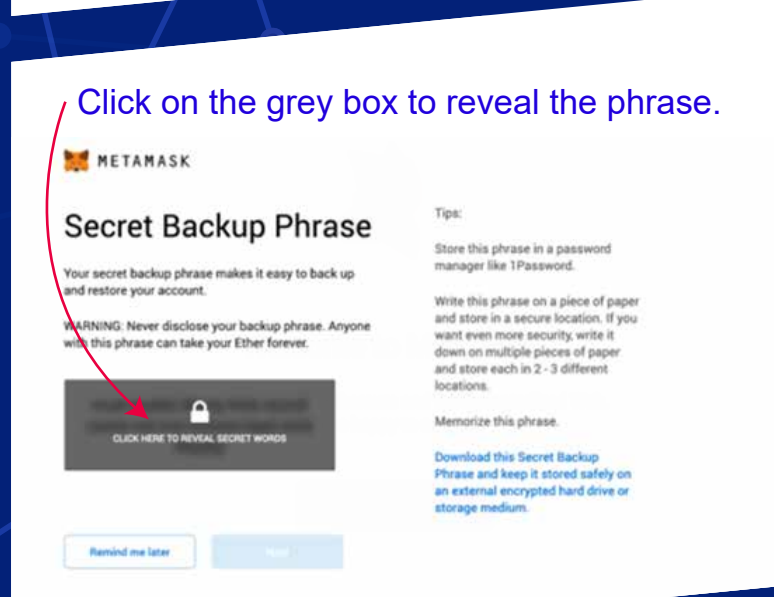

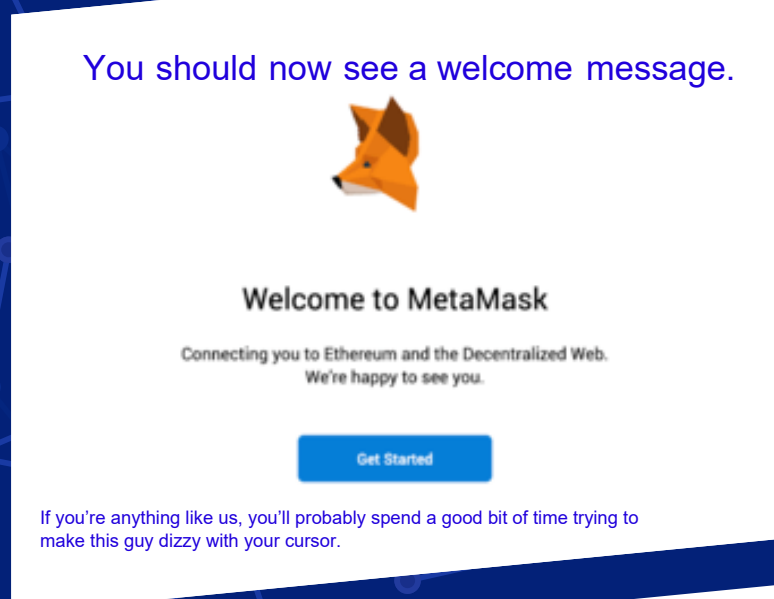

### Install MetaMask

The MetaMask wallet can be installed on Google Chrome, Firefox, or the Brave Browser. It's also available on iOS and Android. We're going to use Firefox throughout this tutorial, but your steps will be more or less identical, irrespective of the platform you're using.

Head over to the official download page on [metamask.io](https://metamask.io). Select your browser, which will take you to the Chrome web store or the Firefox add-ons site, or your smartphone's App Store. Click on the button to add the extension to your platform or install the App. You may need to grant it some permissions before it's up and running. Make sure you're happy with the level of access it has to your browser – if you are, we're good to go.

### Initialize the Wallet

Once you're done pestering the fox on the welcome page, click on **Get Started**. You'll be prompted to either import a **seed phrase** or create a new one. Next, click on **Create a Wallet**. The next page asks whether you want to submit anonymized data to help the developers improve the app. Pick whichever option you prefer.

Now we need to create a password. Come up with a strong password, tick the box, and click **Create**.

Back up your seed words!

MetaMask is a **non-custodial** service, meaning that no one else can access your funds – not even the MetaMask developers. Your tokens exist in a sort of encrypted vault within your browser, protected by your password. That means if your computer is lost, stolen, or destroyed, no one can help you recover the wallet. You will forever lose your **private keys** in the void of cyberspace. So, it's crucial that you write down your **backup phrase**. This is the only way you can restore your account should something unfortunate happen. As suggested, we recommend that you write the words down and store them in two or three different locations. You don't need to bury them in a fireproof safe deep in the forest, but hey, it can't hurt.

When you get to the next page, the program anticipates that you may have been lazy with the previous step because it asks you to confirm the phrase. So, if you didn't the first time, click **Back** and write it down!

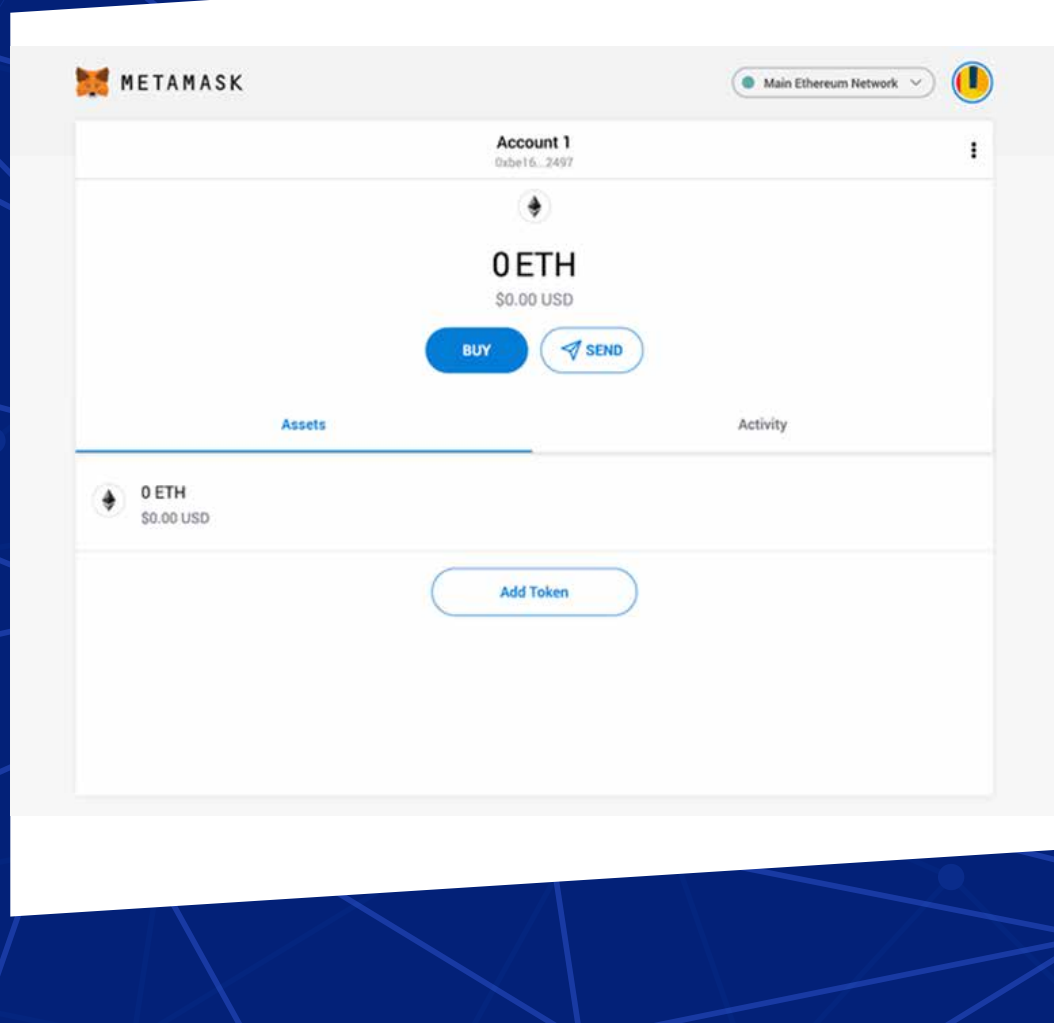

Confirm the phrase, then proceed to the next step. Click **All Done**, and you'll see the wallet interface.

The boring part is over. So let's get some TruBadger tokens!

## Fund the wallet

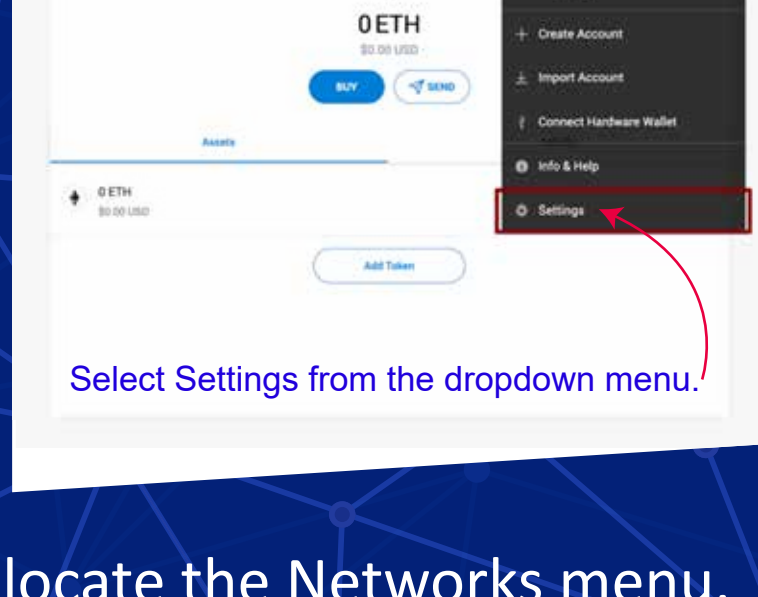

### Connecting MetaMask to Binance Smart Chain

The freshly-initialized MetaMask wallet.

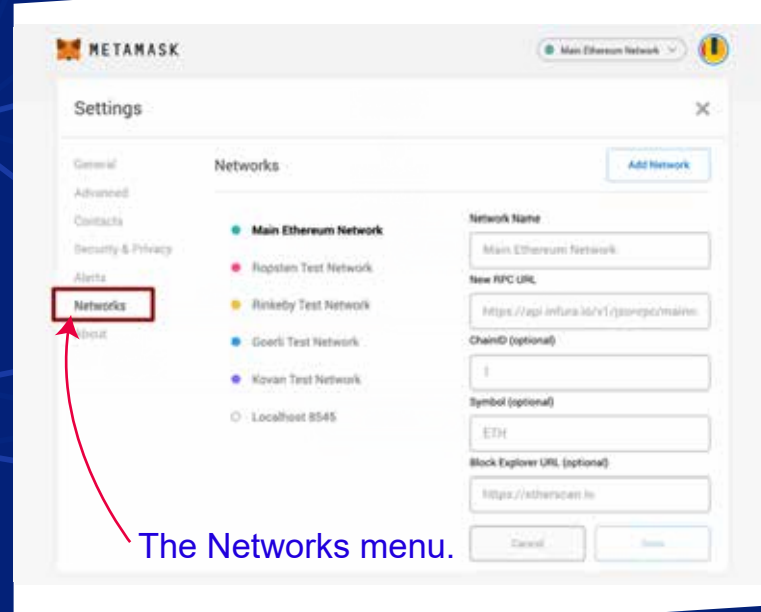

### Configuring the wallet

You might notice straight away that we're still dealing with an **Ethereum** wallet. This won't work with Binance Smart Chain DApps. Let's change that. We want to access the **Settings** to point the wallet towards Binance Smart Chain nodes.

Select Settings from the dropdown menu.

On the Settings page, we want to locate the Networks menu.

We want to click **Add Network** in the top-right corner to **add the Binance Smart Chain network manually** – it doesn't come packaged with MetaMask. It's important to note that there are two networks we can use here: the testnet or the mainnet. Below are the parameters to fill in for the mainnet, which you will use to swap BNB Smart Chain for TruBadger token.

### Mainnet

**Network Name:** Smart Chain  
**New RPC URL:** <https://bsc-dataseed.binance.org/>  
**ChainID:** 56  
**Symbol:** BNB  
**Block Explorer URL:** <https://bscscan.com>

## 2. Buy BNB using ONE of the following options and send it to your MetaMask Wallet.

A. **Crypto.com** for iPhone and Android charges no fees for the first 30 days and is a great option!

- From the home screen, tap the bottom button at the bottom (lion symbol).
- Tap the "Buy" plus sign at the bottom.
- Tap on the search magnifying glass.
- Type "BNB" in the search field.
- Tap "BNB" from the list.
- Select your purchase method and add it. (Credit or Debit)
- Select "Crypto Currency."
- Tap the search icon.
- Type "BNB" in the search field.
- Choose "Binance Coin."
- Complete your purchase of BNB coin.
- Open Trust Wallet on your smartphone.
- Make sure "Smart Chain" BNB is in your list of tokens under the Wallet tab. (If not, tap the two lines at the very top right with the staggered circles over them, type BNB in the search field and toggle the switch to the ON position next to "Smart Chain", and tap "Done" at the top right. Smart Chain should now appear in your list of tokens on the Wallet Tab.
- Open "Smart Chain" in the list of tokens on your Wallet Tab.
- Tap the "Copy" button.
- Open the Crypto.com app and tap "Accounts" at the bottom.
- Tap BNB from the list of assets.
- Tap "Transfer" in the upper right.
- Tap "Withdraw."
- Tap "External Wallet."
- Tap the "+" symbol at the top right and tap "Wallet Address."
- Paste your Trust Wallet address in the Wallet Address field.
- You can name the Wallet anything you want to help you remember what it's for.
- Tap "Withdraw BNB" next to the Wallet Address you just added.
- Enter the amount of BNB you want to withdraw and tap "Withdraw."
- Tap "Confirm" to complete the withdrawal.

### A.1. Swap BNB for Smart Chain BNB in Trust Wallet

- Tap "DEX" at the bottom middle of your Trust Wallet app.
- Select "BNB" in the "You Pay" field.
- Select "Smart Chain" in the "You Get" field.
- Enter the amount of BNB you want to swap for Smart Chain BNB in the "You Pay" field.
- Tap the "Swap" button.
- Tap the "Send" button to complete your Swap.
- Sync Trust Wallet with MetaMask wallet after adding Binance Smart Chain to MetaMask as described above.

Video tutorial: <https://youtu.be/McF6NdKqQL4>

### B. Trust Wallet for iPhone and Android allows you to buy BNB already on the Binance Smart Chain easily.

- Open the App Store for your smartphone, search for "Trust Wallet," and install it.
- Open the Trust Wallet app.
- Set up your Trust Wallet account.
- In the "Wallet" section of the Trust Wallet app, tap "Smart Chain."
- Tap "Buy Smart Chain".
- Enter the amount you want to purchase.
- Tap "Next," enter your credit or debit card information, and complete your purchase.
- Open Trust Wallet with MetaMask wallet after buying BNB in Trust Wallet and adding Binance Smart Chain to MetaMask as described above.

## How to Swap BNB Smart Chain for TruBadger token on PancakeSwap on MetaMask:

- Sign in to MetaMask.
- Make sure Binance Smart Chain Network is added to MetaMask as described above.
- Open <https://pancakeswap.finance/> (Pancake Swap) in Chrome or Brave Browser on your computer or in the "Browser" from the left menu in the MetaMask Mobile App.
- Click "Trade" on the left menu.
- Click "Exchange" in the options.
- Click the three lines at the top left of the Swap section to open the Swap settings.
- Change the "Slippage tolerance" to 15%.
- Change the "Transaction deadline" to 120 minutes.
- Click the "x" at the top right of the Swap settings panel to close it.
- Copy the TruBadger token Contract Address from the "TruBadger Official" Telegram Chat or the official TruBadger website, <https://www.trubadger.io/>
- Click "Select a currency" in the "To" field of the Swap section of Pancake Swap.
- Paste the TruBadger token Contract Address in the "Search name or paste address" field.
- Click the "Import" button.
- Check the box next to "I understand."
- Click the "Import" button again.
- Enter the number of BNB you want to Swap for TruBadger token in the "From" field or simply click "Max" to Swap ALL of the BNB in your MetaMask Wallet for TruBadger tokens.
- Click "Swap" to complete your Swap.

## How to add TRUBGR to your list of tokens in Metamask Wallet:

TruBadger

- Make sure it says "Smart Chain" at the top of your MetaMask and Click "Assets."
- Scroll to the bottom of the list of Assets and click "Add Token."
- Copy and Paste this TruBadger token contract address into the "Token Contract Address" field:

**0xc003F5193CABE3a6cbB56948dFeaAE2276a6AA5E**

- Click "Next."
- Click "Add Tokens."
